This has been rebored to a 35 Whelen Improved The one on the right again a 30-06, but with a shorter barrel that I made into a knock around quad rifle with pivot mounts.. The factory says all barrels are date code stamped, well I have found some that are not, or if they are, are so erratic stamping that trying to decipher them is impossible.

Remington Model 1934 rifles based on Model 30 actions were produced in 7×57mm as service rifles for Honduras.. This decoder works for all Remington firearms which have two-letter code on their barrel.. BARREL DATE CODE - stamped exposed on LH top rear of barrel after 1920Military Model 1917 Rifle: Remington: Covering numbers: 1 - 646000.. Remington 700 or 1100 serial numbers can be decoded the same way as Remington 870 serial numbers.. In 1934 500 Remington Model 1934 were delivered and in 1935 2,500 Remington never (\*) used serial numbers to identify the date of manufacture of it's firearms, they however stamped a date code (spelled out below) by the first letter meaning the month and the last letter the year of manufacture.. Soldiers were issued the same ammo belt, regardless of which rifle was issued/used.. Later, Remington Arms redesigned the M1917, removing the 'ears' and changing it to cock-on-open, to become the Remington Model 30 series of rifles in the interwar period.. The 1917 was heavier and used a different bayonet, a carry over from the P-14 303 cal Enfield..

REMINGTON MANUFACTURING DATE CODE stamped on LH top rear of barrel, 2 or 3 digit, (month first, year after) these will normally only be the last letters as seen below, with the whole list shown here ONLY if it had been returned for repairs The anchor shown here with the date code is just a symbol, as many different inspector marks will be seen The above information was taken from Remington's own information sheet, so if your gun may not conform, then I am also at a loss in explaining. e828bfe731 [1.7.4 Minecraft Download Cracked](#)
